

Platinum Sponsor

Strategic sponsorship and governance

Platinum sponsorship is for large, cross-technology, organizations whose market is global, and whose information-sharing and interoperability challenges are global in scale. Recognizing that individual standards alone are insufficient, and that in a global economy no single economic region can act alone to ensure interoperability, Platinum sponsors recognize the need for a global approach for interoperability. As a Platinum sponsor you enjoy the following benefits:

- Two seats on the Advisory Board that influences all aspects of HISPI on strategy formulation through constant feedback with the Governance Board and attending the regular Governance Board meetings.
- Your organization's logo prominently displayed on the HISPI member's webpage with a link to your company's site.
- A leadership position within the HISP Training Forum. In this position, you can initiate, participate, review and influence new ideas and strategies designed for the HISP training providers led by the HISP course content developers, aimed at improving course delivery, improvements, and ideas for new modules and mini courses that will support continuing professional education (CPE) options.
- An interview spot on the popular "Collective Intelligence" podcast series hosted by John DiMaria, President of the HISPI.
- Ten individual memberships to the HISPI for your organization.
- Five e-mail blasts during the year to the HISPI members on your behalf to pass on educational and informative content.
- 20% discount on HISP training for employees through participating authorized training providers.

The HISPI is proud of our platinum sponsors and their commitment to multi-vendor integration through open standards, testing, and certification. Through their international standards-compliant products and active involvement in HISPI, they are making enterprise integration and multi-vendor interoperability a reality.

Sponsorship Pricing

Platinum: \$5,000/Yr

Gold Sponsor

Leadership and Sponsorship

Gold Sponsors are organizations serving customers (both internally and externally) with significant integration challenges. Working openly with customers, competitors, suppliers, and partners to resolve these issues across the board, while safeguarding unique security and technology requirements, means taking a leadership position in HISPI through small group forums.

As a gold sponsor, your organization will have a unique position within the forum you select. In this position, you can initiate, participate, review and influence new ideas and strategies designed for the HISPI that can be rolled out to the members to provide guidance on how to improve security interoperability in multi-vendor/multi-compliance environments.

As a gold sponsor the organization will enjoy the following benefits:

- One seat on the Advisory Board that influences all aspects of HISPI on strategy formulation through constant feedback with the Governance Board and attending the regular Governance Board meetings.
- Your organization's logo prominently displayed on the HISPI member's webpage with a link to your company's site.
- Five individual memberships to the HISPI for your organization
- Three e-mail blasts during the year to the HISPI members on your behalf to pass on educational and informative content.
- 15% discount on HISP training for employees through participating authorized training providers.

Silver Sponsor

Industry Leadership

Silver sponsorships equals participation in the process that leads to open standards and certification measures. Silver sponsorship means involvement i.e. the opportunity to learn, advice and influence the HISP development process.

Silver sponsors benefit from active participation in one selected forum such as e-Discovery, Cloud Computing, Virtualization, Outsourcing, Legislative trends or any other proposed topic aimed at industry interoperability and have an influential presence in their group. Silver members target their energies at a single market segment and bring to the forefront their individual security and/or technology and business requirements in the definition and development of new approaches and best practices that can enhance the security environment in the specific industry topic. These industry forums are led and coordinated by a HISPI committee member, representing a great way to get your organization and its solutions global exposure.

In addition to the above, as a silver member you'll enjoy the following benefits:

- Your organizations logo prominently displayed on the HISPI member's webpage with a link to your company's site.
- Three individual memberships to the HISPI for your organization
- One e-mail blast during the year to the HISPI members on your behalf to pass on educational and informative content.
- 10% discount on HISP training for employees through participating authorized training providers.

Academic Sponsor

Far too often the commercial world has paid the price of not taking advantage of the advancements and developments going on in the academic world. Conversely, academia misses out on industry input, user focus and 'real-world' perspective on their work.

In recognition of the efforts, advancements and developments made by academia, we are proud to establish two new sponsor categories, Academic and Distinguished Academic.

The involvement of academia with the activities of the HISPI provides a number of benefits:

1. The members of academia are encouraged to understand and influence current business practices in the industry in order to better adapt their curriculum and student activities.
2. The HISPI members gain visibility, new ideas and visions, showcase new solutions, and gain an opportunity for organizational promotion.

Through Open Group Forums the HISPI provides unequalled opportunities for the exchange of information between member organizations, and the inclusion of academia only serves to improve the knowledge of all members; they learn about and shape the new ideas, concepts and technologies that universities, colleges, and technical institutes have to offer.

Sponsorship Information

The benefits of academic sponsorship includes:

- A free one-year sponsorship to the HISPI for Students enrolled in information security or information assurance programs. (Proof of full-time enrollment required).
- Access to all Forums, podcasts, webinars and papers.
- The member may participate in all group activities, and is encouraged to deliver presentations, showcase technology, and present papers.
- Submit papers for publication through HISPI on-line catalog.
- Attend HISPI sponsored conferences at a reduced rate.
- 20% discount on all HISP training through participating authorized training providers.

The benefits of the Distinguished Academic Sponsorship include:

In addition to the benefits of the Academic Sponsorship (above)

- Member privileges on the HISPI Advisory Board.
- Your organizations logo prominently displayed on the HISPI Academic Member webpage with a link to your site.

The only limitation placed on holders of these new members is that they must be on the academic staff of an accredited university, college, or technical institution.

Sponsorship Pricing

Academic Sponsorship is a reduced price per facility. Please call.
